

DORMA Automatics

Advanced Automatic Door Solutions

DORMA ED1400 Low Energy Balanced Door

DORMA introduces the ED1400 Low Energy Balanced Door. Balanced doors are known for smooth operation, wind stack advantages, and monumental styling.

The DORMA ED1400 automatic balanced door is constructed with premium-grade aluminum extrusion and is precision-assembled to the highest standard.

The automatic operator uses the DORMA ED400 as its controller for the opening function while the closing function is augmented by a manual hydraulic operator. Combining both systems

ensures super smooth operation in both automatic and manual mode.

There are a number of sizes and options to choose from, with the base unit size being 7'-0" x 3'-0". In addition to clear and dark bronze aluminum, we also offer over 20 special anodizing finishes and literally countless colors of painted finishes.
